

BZ-5600 Organic silicon defoamer

Composition: Modified polysiloxane compounds

Appearance: colorless transparent liquid

Active ingredient: 100%

Solvent: None

Application scope: used for roll coating, coating UV, epoxy, thick paint coating, baking paint, polyurethane materials.

Recommended dosage: Dilute the defoamer to 3-5% concentration and add 0.3-1.0%.

Directions:

Can be added at any time during the production process, including after adding, please mix well, please test before use.

Characteristics and advantages

- 1. good compatibility with most solvent-based coating systems;
- 2. can prevent air bubbles caused by mechanical force during mixing, manufacturing and application.
- 3. fast foam control ability, excellent defoaming and defoaming properties; can reduce fish eyes, pinholes, craters and other film defects.

Package:

25KG non-recycled blue pail.

Before the product is completely empty, the lid must be tightly closed after use.

Storage:

Keep away from heat and light source and keep away from light.

Precautions:

Please carefully evaluate the effect on compatibility and shrinkage before use.

The above information is based on the product, due to the producer's formula, production process, construction conditions are different, the above statements are for reference only.

The company does not assume any legal responsibility, please test the dosage before use.
