

High efficient general purpose defoamer W-4003

Physical and chemical properties:

Composition: Mixture of stearate, specialty emulsifiers and mineral oils, etc.

Appearance: light yellow liquid

Effective content: 100%

Ionic properties: nonionic

Application properties:

It has outstanding fast defoamer, strong foam inhibition, wide versatility and long-lasting defoaming and foam inhibition effect for many aqueous systems;

This product is a non-ionic system, can be applied to a variety of anionic, cationic and non-ionic systems of defoaming;

It is especially suitable for all kinds of building coatings, adhesives, emulsions and other water-based systems.

Usage assistance:

Suggested dosage (in total): 0.05 ~ 1.0%;

It is recommended to add the product in 2 to 3 times, the specific amount of addition and addition process according to the specific production formula and process, in order to achieve the desired effect until;

As it does not contain silicone, it can effectively avoid various side effects caused by silicone oil;

Layering may occur during storage, and must be stirred well before use.

Other notes:

Packing: 25, 180kg/drum;

Storage: This product is stable, non-flammable and non-explosive; it should be closed to prevent the intrusion of debris after use;

Place it in ventilated and dry environment, avoid exposure to sunlight and rain; the effective storage period is more than 12 months.
