

BZ-410 strong fluorine-containing defoamer additive

Composition: Fluorine modified siloxane

Typical physical data

Appearance: colorless or yellowish liquid

Active ingredient: 2%

Solvent: Tetramethylbenzene

Application scope: suitable for: solvent-based coatings; recommended for: light-curing coatings solvent-free coatings;

Recommended dosage: 0.1-0.8% of the total formula.

Usage: Can be added at any time.

Characteristics and features:

Good compatibility with various resin systems, with excellent defoaming and bubble breaking effect, and very high defoaming effect on both small micro-foam and large foam in coating products.

Packing:

25kg non-recycled blue pail.

Before the product is completely empty, the inner and outer lids should be tightened after use.

Storage: Keep away from heat and fire, and keep away from light.

Precautions: Please carefully evaluate the effect on compatibility and shrinkage before use.

The above information is based on the product, due to the producer's formula, production process, construction conditions are different, the above statement is for reference only, the company does not assume any legal responsibility, please test the dosage before use.

The company has the right to improve its own products, any changes in its specifications, without prior notice.
